

# What can we learn from Humanism?

## Skills:

- Acknowledge that many religious people will embrace the principles of Humanism.
- Understand the importance that Humanists attach to rational thought, evidence, logic and science.
- Understand the importance that Humanists attribute to the legacy of human achievement in intellectual, scientific, artistic, cultural and philosophical spheres.

## Star vocabulary:

**Humanism** - a way of thinking that emphasises living a good, happy, and meaningful life without religion, focusing on kindness, reason, and making the most of the one life we have, while respecting others and the planet.

## **Humanist naming ceremony**

---

---

---

**Social responsibility** - recognising the impact of their actions on society

**Volunteering** - \_\_\_\_\_

## Must Know Knowledge

- Define Humanism and articulate what Humanists believe about human origins, values, purpose and destiny.
- Speak about the role and importance of reason, evidence and science for Humanists
- Outline how Humanists approach the main events and passages in a human life, understanding how they differ from religious celebrations.
- Identify the key aspects of Humanism from which religious people can learn and derive meaning.
